

Publication - National Ocean Service - U.S. Coast Pilot 2, covers the Atlantic coast from Cape Cod to Sandy Hook, embracing part of the Massachusetts coast and all of the coasts of Rhode Island, Connecticut, and New York., 2013 (42nd) Edition.

Corrections

Chapter 4, Paragraph 8, read:

- (8) All vessels 65 feet or greater in length overall (L.O.A.) and subject to the jurisdiction of the United States are restricted to speeds of 10 knots or less in the Cape Cod Bay Seasonal Management Area between January 1 and May 15. The area is defined as all waters of Cape Cod Bay with a northern boundary of 42°04'56.5"N., 70°12'W., to 42°12'W., thence due west back to shore. The restriction applies to a Seasonal Management Area off Race Point between March 1 and April 30. The area is defined as the waters bounded by:

(50 CFR 224.105)

Chapter 5, Paragraph 192, read:

- (192) All vessels 65 feet or greater in length overall (L.O.A.) and subject to the jurisdiction of the United States are restricted to speeds of 10 knots or less in the Cape Cod Bay Seasonal Management Area between January 1 and May 15. The area is defined as all waters of Cape Cod Bay with a northern boundary of 42°04'56.5"N., 70°12'W., to 42°12'N., 70°12'W., thence due west back to shore. (See **50 CFR 224.105** in chapter 2 for regulations, limitations, and exceptions.)

(50 CFR 224.105)

Chapter 9, Paragraph 99, read:

- (99) **Greens Ledge** is a rock and sand ridge that extends 1.1 miles southwestward from Sheffield Island. Depths of 10 to 15 feet extend about 400 yards westward and southwestward from Green Ledge Light. A rocky ledge, on which the least found depth is 21 feet, extends 0.8 mile west-southwestward from the light. Two additional rocky ledges are about 0.4 mile south-southeast and 0.45 mile southeast from the light, with least depths of 20 and 19 feet respectively.

(L 55-2013; DD 22738)

Chapter 11, Paragraph 15, read:

- (15) Eastward of Fire Island Light the water shoals quite rapidly toward the Long Island shore, but inside a line drawn from 12 miles south of Fire Island Light to Barnegat Lighted Buoy B, there is no marked difference in the soundings as either shore is approached except in Mud Gorge.

(NOS 13)

Chapter 11, Paragraph 24, read:

- (24) The effect of the wind on the current should always be considered. The largest velocities likely to occur during storms are 2.5 knots southward of Nantucket Shoals and 1.5 knots 9 miles south of Fire Island Light. The tidal currents from the latter location have a mean velocity at strength of about 0.2 knot in a westward direction on the flood and an eastward direction on the ebb.
