Chapter 5, Paragraph 311, read:

- (311) Johns Pass, about 3 miles N of Blind Pass, between Treasure Island and Sand Key, affords passage for small craft from the Gulf to the N part of Boca Ciega Bay. A marked channel leads from the Gulf of Mexico through Johns Pass thence N to the Intracoastal Waterway. The channel is reportedly subject to considerable shoaling between Daybeacon 1 and Buoy 3. Extreme caution and local knowledge of the channel conditions is advised. The entrance to the channel is marked by a light and the channel is marked by lights, buoys and daybeacons. In Johns Pass the flood current sets NE at an average velocity of 2.0 knots and ebbs SW at an average velocity of 1.5 knots. (See Tidal Current Tables for daily predictions.)

Chapter 13, Paragraph 490, read:

- (490) Punta Tuna Light (17°59'19"N., 65°53'07"W.), 111 feet above the water, is shown from a white octagonal tower on a dwelling, near the end of the point. The point projects as a high cliff; a 400-foot hill 0.5 mile N is prominent.
