

Publication - National Ocean Service - U.S. Coast Pilot 8, covers the panhandle section of Alaska between the south boundary and Cape Spencer. In this volume, general ocean coastline is only 250 nautical miles, but tidal shoreline totals 11,085 miles., 2012 (34th) Edition.

Corrections

Chapter 5, Paragraph 367, read:

(367) **Coffman Cove**, protected on the N by Coffman Island, is close W of the unnamed cove and about 1.5 miles SSE of Beck Island. The NW half of the cove is filled with rocks, some of which bare. Good anchorage for small craft may be had in the middle of the SE part of the cove in 8 to 10 fathoms; mud bottom, and a midchannel course will carry in safely. The passage into the SE part of the cove E of Coffman Island is marked by lights and lighted buoys. The outermost dangers in the SE part of the cove are a 2½-fathom spot in about 56°01'09"N., 132°50'22"W., and a rock awash in about 56°01'07"N., 132°50'25"W., about 500 yards and 600 yards SSW of the southernmost tip of Coffman Island, respectively. A flat extends about 0.2 mile from the SE end of the cove.
