

Publication - National Ocean Service - U.S. Coast Pilot 9, deals with the Pacific and Arctic coasts of Alaska from Cape Spencer to the Beaufort Sea. General ocean coastline totals 5,520 nautical miles, and tidal shoreline totals 18,377 miles., 2012 (30th) Edition.

Corrections

Chapter 5, Paragraph 324, read:

(324) To reach the V-shaped cove SE of Svitolak Island from a position 1.2 miles **000°** from Cape Chiniak Light, steer **267°**, heading for **Kekur Island** with **Middle Island** summit on range, until the sharp point on the W end of Isthmus Bay bears **191°**. Then turn left to course **240°** and head for **Utesistoi Island**, S of Svitolak Island, until abeam of the N end of Svitolak Island. Then turn left to **220°** and head for the point at the S entrance of the cove until Utesistoi Island bears four points on the starboard bow. Then steer **180°** and anchor in 6½ to 7 fathoms 400 yards off the S shore. To go farther into the cove requires local knowledge. The channel abreast Svitolak Island is narrow with shoal water on both sides; caution should be exercised to avoid depths of less than 10 fathoms. The shoal water on the E side of the channel is extensive and surrounds the point forming the N limit of the cove.

Chapter 8, Paragraph 364, read:

(364) Village Cove serves as a refuge for the fishing fleet of the Bering Sea and is protected by breakwaters marked by lights. There are three main docks in the harbor with depths of 9.5 to 23 feet alongside and deck heights of 11 feet. The small boat float has a depth of 15 feet alongside. Caution should be used when approaching the harbor as heavy swells may still break near the entrance.
