

Publication - National Ocean Service - U.S. Coast Pilot 9, deals with the Pacific and Arctic coasts of Alaska from Cape Spencer to the Beaufort Sea. General ocean coastline totals 5,520 nautical miles, and tidal shoreline totals 18,377 miles., 2012 (30th) Edition.

## Corrections

### Chapter 4, Paragraph 1154 through Paragraph 1155, read:

(1154) **The City Pier** (59°26'27"N., 151°43'15"W.) has a 370-foot berthing space with 20 feet alongside and a 15-foot deck height. There are two 2-ton electric-hydraulic derricks and pipelines extend from the wharf to tank storage for 7,650 barrels. The pier is used for receipt of petroleum products, ferry landing, fueling vessels and occasional receipt and shipment of conventional general cargo. The pier is owned by the State of Alaska and is operated by the State of Alaska and Seldovia Fuel & Lube, Inc. A 40-foot fueling float for vessels under 70 feet is alongside the S face with 23 feet reported alongside. The back side of the face has 160 feet of berthing space, and 20 feet reported alongside.

(1155) **Seldovia Small-Boat Harbor** (59°26'12"N., 151°42'52"W.), is protected by breakwaters; the N breakwater is marked by a light. A Federal project provides for a dredged entrance channel leading NE to a basin inside the breakwaters. In 2010, the controlling depth was 12 feet in the entrance channel with 10 to 12 feet in the basin. The area SE of the Federal project is maintained by local interests. The harbor provides moorage for about 150 vessels with some transient space available. The harbormaster's office, at the N end of the small-boat harbor parking lot, monitors VHF-FM channel 16 and can be contacted by calling 907-234-7886 for berth assignments. Supplies and repairs are limited but water, electricity, a launching ramp and lift for vessels to 48 feet are available. Two timber tidal grids are in the basin on either side of the approach. The basin is owned by the State and operated by the city.
