Integration of Navigation & Waterways Vessel Traffic Data:

Highlighting Storm & Flood Protection Concerns

HSRP Gulf of Mexico Public Meeting

Captain Peter Gautier

Maritime Hurricane Contingency Port Plan

Port Conditions:

- WHISKEY: Gale force winds are predicted at Southwest Pass in 72 hours.
- X-RAY: Gale force winds are predicted at Southwest Pass in 48 hours.
- YANKEE: Gale force winds are predicted at Southwest Pass in 24 hours. (Note: This condition is also used after the storm passes due to navigation controls and vessel traffic control measures still being in effect.)
- ZULU: Gale force winds are predicted at Southwest Pass in 12 hours.
